Call for Agent Builders

Our Vision

We're building the operating system for AI-native organizations – a future where small teams can build million- (and eventually billion-) dollar companies by leveraging teams of AI agents. Our initial focus is helping independent experts (consultants, advisors, recruiters) scale their practices with expert agents.

The Opportunity

As an Agent Builder, you'll be part of our crucial first phase: working directly with independent experts to create valuable, production-ready agents. Your success will help validate our approach and shape the development of our no-code Studio and Marketplace platforms.

Our Path to Market

1. Current Focus: Expert-Builder Partnerships
 - Match skilled agent builders (you!) with independent experts
 - Create and iterate on expert agents that deliver real value
 - Build a simple dashboard for startups and founders to interact with your agent
 - Learn what makes expert agents successful
2. Next: Studio Development
 - Use insights from expert-builder partnerships to create our no-code Studio
 - Enable experts to create their own agents
3. Future: Marketplace Launch
 - Launch marketplace featuring the best-performing expert agents

The Role: Agent Builder

As an Agent Builder at AG2, you'll work directly with independent experts to create agents that effectively scale their expertise. You'll be instrumental in our learning and validation phase, helping prove what's possible with expert agents.

Key Responsibilities

- Partner with independent experts to understand and capture their workflows
- Design and implement specialized agents that effectively replicate expert capabilities
- Create multi-agent systems that coordinate complex tasks
- Iterate based on real-world usage and feedback
- Document successful patterns and contribute to our growing library of best practices

Technical Requirements

- Strong familiarity with AG2 framework and multi-agent architectures
- Experience with LLMs and understanding of their capabilities/limitations
- Knowledge of RAG systems and tool integration

What You'll Build

Examples of expert agents we're exploring:

1. Recruiter Agent: Transforms \$150k executive searches into \$30k agent-led processes. Handles requirement gathering, candidate sourcing from proprietary databases, initial screening, and coordination - with the expert stepping in for final evaluations.
2. Content Agent: Scales \$5k content creation into \$1k agent-driven solutions. Manages client briefs, brand guidelines, market research, and content generation (including graphics) - with expert review for quality assurance.
3. R&D Tax Credit Agent: Converts \$20k tax credit consulting into \$5k agent-led service. Analyzes company expenses, identifies qualifying activities, prepares documentation, and estimates credit value - with expert review of final submissions.

What Success Looks Like

For each expert partnership:

- Month 1: Build and launch a revenue-generating expert agent
 - Week 1-2: Work closely with expert to understand their workflow and value proposition
 - Week 3-4: Build, test, and refine the agent for initial customer use
- Month 2+: Support and iterate based on customer feedback while the agent generates revenue

Compensation

- \$10,000 base payment for successfully building each expert agent
- 5% revenue share from the expert agent's earnings for 12 months
 - Our goal is for each expert agent to generate \$100k in the first 30 days

Our Process

Application & Selection

1. Submit your application: <https://jc9pie8gn0f.typeform.com/to/heccu9R2>
2. Selected candidates will hear from us within 2-3 business days
3. Initial call with the AG2 team to discuss experience and opportunities

Getting Started

1. We'll match you with an independent expert based on your background and interests
2. Kick-off call with the expert to align on goals and timeline
3. Weekly check-in calls with the expert and AG2 team to ensure progress
